🔥 Total 13 (8 + 5) : Type ke React Imports (For Real Use)

✅ 1. React Core Imports

```
import React from 'react';
import { useState, useEffect } from 'react';
```

📌 Ye sab har component me use hote hain
🔹 `useState`, `useEffect` = most used hooks
✅ **Must-know**

✅ 2. React DOM / Router Imports

```
import ReactDOM from 'react-dom/client';
import { BrowserRouter, Routes, Route, Link } from 'react-router-dom';
```

📌 **rendering & routing** ke liye
✅ `BrowserRouter`, `Routes` = full app structure ke base

✅ 3. Advanced Hooks Imports

```
import { useRef, useMemo, useCallback, useContext, useReducer } from 'react';
```

📌 Performance optimize karne aur shared logic handle karne ke liye
✅ `useRef`, `useMemo`, `useCallback` = heavy component optimization me helpful

✅ 4. Form Libraries

```
import { useFormik } from 'formik';
import * as Yup from 'yup';
```

📌 Form validation aur user input ke liye
✅ Signup, Login, Search Forms me use hota hai

✅ 5. API Utilities

```
import axios from 'axios';
```

📌 Backend se data fetch aur update karne ke liye
✅ CRUD apps me sabse zaroori cheez

✅ 6. Component/CSS/Assets

```
import Header from './components/Header';
import './App.css';
import logo from './assets/logo.png';
```

📌 Custom components, styles aur media assets ko laane ke liye
✅ Har project me bar bar use hota hai

✅ 7. Context Providers

```
import { AuthProvider } from './context/AuthContext';
```

📌 Global state handle karne ke liye (auth, theme, language etc.)
✅ Redux alternative ya lightweight global state system

✅ 8. Testing Imports (Optional)

```
import { render, screen } from '@testing-library/react';
import '@testing-library/jest-dom';
```

📌 Component testing ke liye
✅ Production-grade apps ya team projects me helpful

🔥 Total 5 : Types of React Imports (For Advanced Use)

✅ 9. Lazy Loading & Suspense

```
const LazyComponent = React.lazy(() => import('./LazyComponent'));

Loading...
```

📌 Code-splitting ke liye useful hai
✅ Performance optimized large React/Next apps ke liye must

✅ 10. Error Boundaries

```
class ErrorBoundary extends React.Component {
  componentDidCatch(error, info) {
    // error handle
  }
  render() {
    return this.props.children;
  }
}
```

📌 App crashes ko gracefully handle karne ke liye
✅ Mostly used with dynamic components or lazy imports

✅ 11. Third-Party UI Libraries

```
import { Button } from 'antd';
import { Box } from '@mui/material';
```

📌 Readymade UI components fast design ke liye
✅ MUI, Chakra UI, Ant Design sab production me use hote hain

✅ 12. Redux / Zustand (Advanced State)

```
import { useSelector, useDispatch } from 'react-redux';
import { useStore } from 'zustand';
```

📌 Complex ya global state management ke liye
✅ Redux toolkit ya Zustand = scalable architecture ke liye perfect

✅ 13. Custom Hook Sharing

```
// useFetch.js
import { useState, useEffect } from 'react';

function useFetch(url) {
  const [data, setData] = useState(null);
  useEffect(() => {
    fetch(url).then(res => res.json()).then(setData);
  }, [url]);
  return data;
}
export default useFetch;
```

📌 Reusable logic banane ke liye (DRY code)
✅ Every medium-large project me helpful

📜 React Imports Cheat Sheet Summary

- 📦 React Core – `useState`, `useEffect`
- 🌐 DOM & Router – `BrowserRouter`, `Routes`
- ⚙️ Advanced Hooks – `useRef`, `useCallback`
- 📝 Forms – `Formik`, `Yup`
- 🔌 API – `axios`
- 🎨 Components/CSS – Custom imports
- 🌍 Context – `AuthProvider`, custom contexts
- 🧪 Testing – `Testing Library`, `Jest`
- ⏳ Lazy Loading – `React.lazy`, `Suspense`
- ❌ Error Boundaries – `componentDidCatch`
- 📦 UI Libraries – `AntD`, `MUI`
- 🧠 Redux / Zustand – Advanced state tools
- ♻️ Custom Hooks – `useFetch`, reusable logic
